Buzzacott

DRAPER&DASH
Healthcare Analytics

Due diligence for Guinness Asset Management's investment into Draper & Dash Limited.

Our focus is on transactions in the £5m to £100m space including disposals, fundraisings, management buy outs, acquisitions, financial diligence and debt advisory.

About the business

Founded in 2011, Draper & Dash is a provider of operational patient flow, predictive analytics and insights software. The company's SaaS-based analytics platform uses advanced data science and machine learning techniques to predict patient flow and demand for hospitals and care providers.

How we helped

Buzzacott performed financial and tax due diligence, providing an extensive review of both historic and forecast financial performance. Off the back of our analysis, we were able to make several recommendations for the company to implement as it begins to scale up.

The new investment from Guinness Asset Management's EIS Funds will allow Draper & Dash to continue to develop its product offering as well as grow its sales and marketing functions to expand into new territories.
